Their Smiles Our Happiness

Our Company

Established since 1985 in Jakarta, PT. Sinar Harapan Plastik is currently the market leader in the manufacturing and processing of SHP Toys products in Indonesia. We are currently capable of producing and selling up to 600.000 units of ride-on toys within a year.

President's Message

Our Vision is to be a world-class manufacturer of kid's toys for the international market. To achieve this, we continuously develop, improve and sustain our product design and quality, while maintaining our quality-based manufacturing system at the same time. We are continuously looking for credible and reliable business partners from both local and overseas to help expand our business.

Benefits of "Ride-On" toys

1. Improve Mobility

Ride-On toys build the children's gross motor skills by encouraging the use of large muscle groups. When kids climb off and on the ride on toys, they need to balance themselves to avoid falling. Once on the toy, they begin to engage their leg muscles to push themselves along or move the pedals. Further Holding the handlebars teaches children coordination between the hands, arms, legs and feet.

2. Encourage exercise

Starting kids out early with Ride-On toys creates a positive image and encourages small kids to exercise. Ride-Ons are not only economical, but fun way to move around.

3. Inspire Independent Play

Though kids should always be supervised when using Ride-on toys, these kind of play encourages them to move using their own power, riding around the house, the yard, the neighbourhood. This helps them to form opinions and draw conclusions about their surroundings and set the stage for independent thinking they will need later in school.

4. Build Confidence

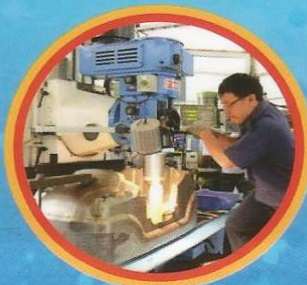

As Kids learn to coordinate the different movements necessary to power ride-on toys, they gain confidence in their own abilities. Moving up the changes from tricycles to bicycles, graduating to motor-bikes and cars are all milestones in which kids takes pride. That confidence will help them in other areas in life and help them to grow positively.

5. Put Kids Outdoors

Since most Ride-on toys can be used in the backyard, on the sidewalk, or at a local park, they encouraged kids to leave electronics behind for some time for productive outdoor play. Being outside gives kids positive stimulation from natural surroundings that they WONT GET from hours spent sitting in front of a screen.

6. Spark Creativity

Kids also like to imagine that they are grown-ups, thus Ride-on toys give them the opportunity to pretend that they are going on trips or doing simple errands such as driving to the nearest store. Inventing games and engaging in pretend plays builds important creative
